URSI 2024

XXXIX Simposio Nacional de la Unión
Científica Internacional de Radio

CUENCA

The National Symposium of the International Scientific Union of Radio has been held in Spain since 1980. In 2024, the XXXIX edition will be held in Cuenca organized by the Grupo de Aplicaciones de Microondas y Milimétricas, y Antenas (GAMMA) of the University of Castilla - La Mancha.

Throughout the sessions, works are presented in various branches of Engineering applied to the field of communications. In the last editions there were around two hundred presentations, and more than 250 researchers attended the symposium. This is a consolidated symposium and, therefore, a unique place for the presentation of products and services by companies in the sector. Furthermore, we consider that it is a framework that generates synergies between University and Company.
